**READ EDITORIAL REPORT ON GRO-MULCH IN AUGUST
ISSUE OF BETTER HOMES AND GARDENS (PAGE 32)**

A most unusual decoration for garden trees. Your friends will marvel at the eerie, romantic setting this graceful moss will create. This is an air plant that will not take any nourishment from the trees. We have moss that has been growing in Chaltanoga for six years, and apparently it will withstand fairly severe temperatures. Twenty-five pounds of moss will usually be sufficient to plant a tree about 6" in diameter. Live, green Spanish Moss will be shipped direct from Napoleonville, La., in 25 lb. bales @ \$2.50; 125 lb. bales @ \$9.00, Express Collect.

QUANTITY PRICES

PALMETTOS

Not only will these distinctive fan shaped palmettos add a tropical appearance to your garden or greenhouse, but the stately green leaves are useful in flower arrangements in the house. Palmettos are vigorous growers requiring very little cultural attention. They have been known to withstand frosts, but it is doubtful if they will survive constant winter temperatures below freezing, unless they are protected in some manner. Particularly attractive around patios, conservatories, greenhouses, etc. Shipped freshly dug from Napoleonville, La., Express Collect. Price \$2.75 each for plants between 24" and 32" tall - 2 for \$5.00.

LOUISIANA IRIS, GIGANTICAERULEA

One of the most talked about of the iris species. Lovely purple flowers blooming in the spring that will be a welcome addition to any collection. Fine mature plants, freshly dug and shipped to you direct from Napoleonville, La. You will be pleased with these at the very low price of \$3.00 per dozen. Parcel Post Collect. (Minimum Order - One dozen plants.)

ATTENTION ORCHID GROWERS

We have just had a report from a large commercial orchid grower who has been experimenting with Gro-Mulch on Cymbidiums and Cypripediums. He reports that the plants that were re-potted in a Gro-Mulch mixture ninety days ago, established themselves with no set-back and now have good color, good root action and vigorous new leads. He is very well pleased with the results obtained.

We invite you to try Gro-Mulch on your Cymbidiums, Cypripediums and allied genera that require a loam mixture. Soil, leaf mold and earthworm fertilization are the ingredients that Nature uses. We feel confident that you will be pleased with the results.

GUARANTEED SATISFACTION

Our guarantee assures that you will be completely satisfied upon receipt of order, or your money will be refunded.
